WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Cooler, wet weather is in store for the next couple of days as a storm system approaches northwest California. Temperatures today and tomorrow will be well below normal, with highs only reaching the upper 60s and low 70s in interior valleys. Light to moderate rain will begin tomorrow morning and last through the day. A warming trend can be expected late week and through the weekend.

Medford Weather:

Light showers in Lake and Modoc Counties will gradually diminish today. A strong cold front arrives on Wednesday bringing a cooling trend, showers, and light breezes to windy conditions. The front is forecast to bring a tenth to a quarter of an inch of rain to most locations. Showers will continue into Thursday before high pressure builds back in on Friday.

Reno Weather:

Low pressure along the west coast will bring windy conditions and much cooler temperatures to the region through Wednesday. Showers will also be possible through midweek with the best overall chances near the Sierra, north of Susanville and Gerlach, and east of Highway 95. Drier conditions with lighter winds and a warming trend are expected later in the week.

San Francisco Weather:

Look for the next shot of rain on Wednesday as a cold front slides across the region, bringing cooler than normal temperatures through midweek. A warming trend sets in for the latter half of the week.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Breezy winds and a few showers will continue across northern California today. More widespread precipitation is likely on Wednesday as an early season weather system moves through. Cooler temperatures expected through mid-week, then gradual warming into the weekend.

Hanford Weather:

Isolated to scattered showers can be expected over the central California interior today along with unseasonably cool temperatures. Wednesday will remain cooler than normal with a few lingering showers over the mountains in the morning. Dry weather with a noticeable warming trend will begin Thursday and continue through the weekend with temperatures averaging well above normal by Sunday and Monday.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

A trough of low pressure will bring cloudy skies and showers along with below normal temperatures today. Showers will end from north to the south tonight through Wednesday morning. A gradual warming trend is expected later this week and into the weekend, with above normal temperatures arriving by the weekend.

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

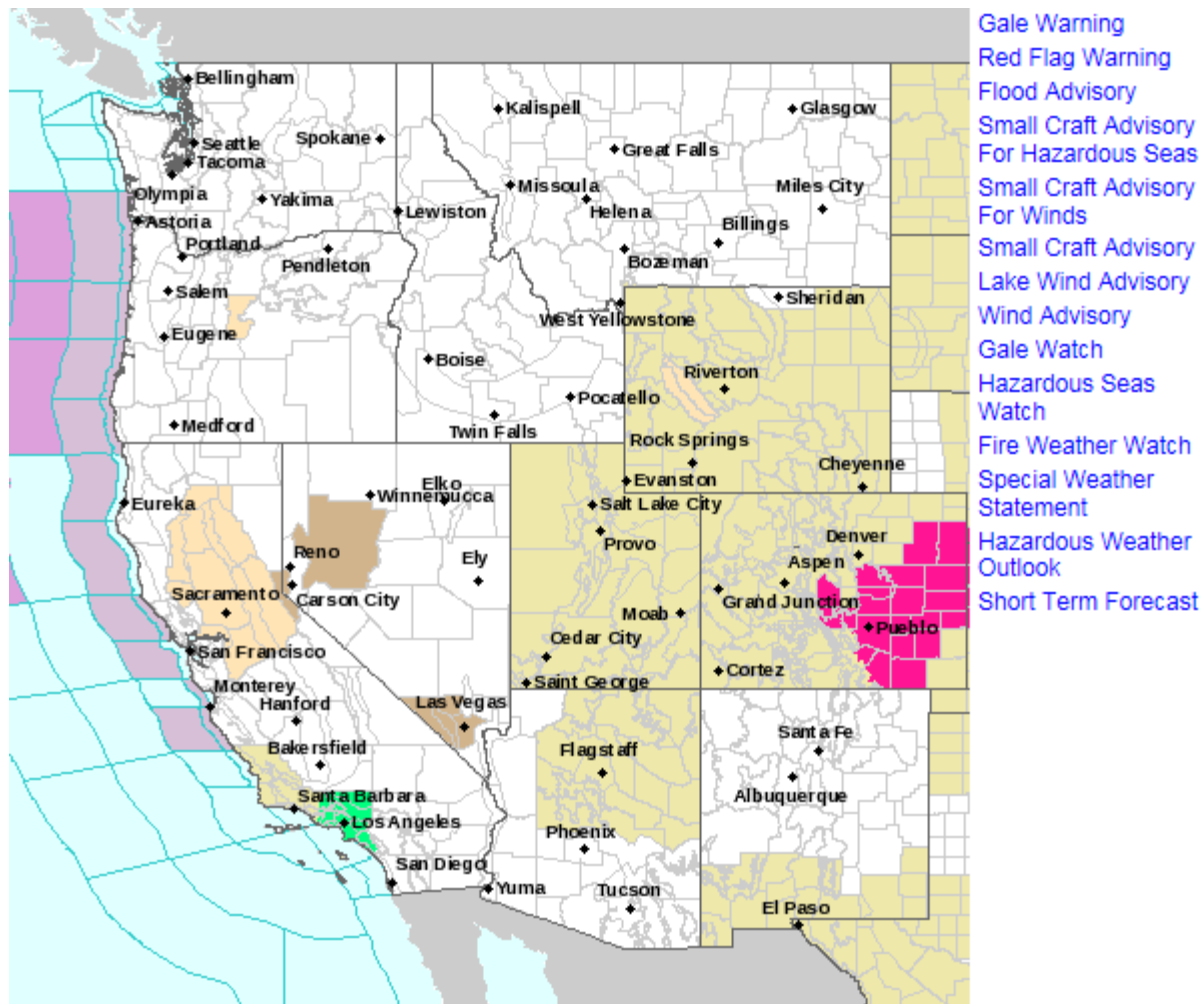

Moisture from the remnants of former Hurricane Linda will bring periods of showers into early Wednesday, mainly along and west of the mountains. Dry weather with a warming trend will follow through next weekend.

Southeast California Weather:

A trough of low pressure combined with several waves of energy within it will result in showers and thunderstorms around as well as gusty winds across the area today and to a lesser extent on Wednesday. Showers and thunderstorms will be confined to Arizona on Wednesday. Otherwise expect dry conditions from Thursday through next Monday. Temperatures will remain below normal through Thursday then warm back above normal by the weekend.
